Industrial Measuring Microscopes...

Unitron's has a long standing reputation in the area of precise optical measurement instrumentation. Our products have been used in every area and discipline for over 40 years. During that time, we have strived to design improved product, offering you the most up to date choices in this critical area.

- **DMM/3000** — Non-contact depth measuring microscope with precise focus image shearing mechanism. Specifically designed for accurate repeatable measurements of X, Y and Z.
- **NSM & TMS SERIES** (not shown) — Universal microscopes for routine measuring of X,Y & Z. Monocular or binocular models available.
- **SG-V** — Universal measuring microscope combines X, Y & Z measuring with infinity plan-achromatic objectives. Models in brightfield, brightfield darkfield or multi system that includes Nomarski interference contrast.
- **LP6 PROFILE PROJECTOR** — Inspects small and large parts on a bright 6" screen in both reflected and transmitted illuminations. Magnification from 5x to 200x.
